RE: MB Docket No. 04-233

Dear Sirs:

I would like to comment about the proposed localism campaign involving low power FM (LPFM) and FM translators. Recent consolidation and "nationalization" has resulted in a loss of local channels or at least the loss of local emphasis due to the large satellite channels. However, the positive result of this consolidation has been the recent development of national type channels heard on FM translators like K-LOVE. These types of stations were generally not available except in large areas or if available they were not of the same quality. We have appreciated the opportunity to listen to K-LOVE (now on 90.9 FM in Southeast Wyoming) because this type of service has not been available in the past.

K-LOVE serves our local community by providing a type of station that is desperately needed and that has been unavailable. Our local community will be missing this resource greatly should this option be taken away. We believe it is in the public interest to continue to allow these types of stations due to their professional and cost effective approach that provides an additional resource to many families. We have become dependent on it in recent months.

Please consider that although your desire for localism is good, it should not come at the expense of existing stations and opportunities. We encourage you to continue to search for improving local channel opportunities while not stifling any existing or even potential other resources that provide community value. Thanks for your consideration. Feel free to contact me at 307 760 8433 if you have any questions.

Sincerely,

Shawn Sullivan
